

Features

Four wide circumferencial grooves, lateral grooves with fine sipes and continuous block patterns on shoulder

Joint-less Nylon Band

Silica tread compound

Rim protectø

Special rib segment design

Serrated groove wål

Benefits

➤ Provide efficient water evacuation, outstanding wet performance and enhanced stability at high speed cornering

➤ Improve tread stiffness and uniformity and deliver high speed stability

➤ Provide better performance on wet surface and reduce rolling resistance

➤ Protect wheels from curb damage

➤ Optimize contact pressure distribution, improve road contact area and provide precise control

➤ Absorb noise and deliver a quieter ride
