SUMMER TYRES 2024

THE FALKEN BRAND

The immense potential of Falken's tyres is created by the latest development technologies, state-of-the-art engineering facilities, test tracks throughout the world that replicate all major road and weather conditions as well as international know-how honed by more than one hundred years of manufacturing tyres. The Falken brand was established in 1983 in its home country of Japan, initially as a flagship brand of high-performance radial tyres. Today, more than four decades later, Falken offers quality products throughout Europe that stand for the highest level of performance, innovation and driving pleasure.

OUR SUCCESSES

The high quality of our tyre products is confirmed to us over and over again – by our many satisfied customers, but also by the high scores and positive results from a host of independent tyre tests. This information delivers constant endorsement that Falken tyres fulfil all the rigorous standards for premium tyres. The tests also regularly confirm Falken’s status as one of the brands offering top value for money. Here is a selection of our test results.

© TOYOTA AG Schweiz

AZENIS | RS820

The ultimate high-performance tyres for sporty vehicles, developed to enhance driving pleasure to the max and provide safety and sustainability in the SUHP tyre sector. Ideal for sporty vehicles and performance-oriented drivers.

FEATURES AND BENEFITS

- Ultra-precise handling ensures outstanding stability and control at all speeds
- For ambitious sports car drivers that demand the utmost from their tyres
- Aramid reinforcements in the tyre structure – high-tech solution from the world of motorsports
- Well balanced performance between dry handling for sporty drivers and everyday safety in wet conditions
- Aerodynamic sidewall design with new Nano-Black lettering

RANGE OF SIZES

- 38 Sizes
- 19–21 Inches
- Series 30–45
- Speed index: (Y)

See page 7 for detailed information.

e. ZIEX

Tailored to the needs of electric vehicles, the e. ZIEX incorporates cutting-edge technologies to minimise rolling resistance. When our development engineers designed this new addition to our family, they also focused on maximising range, lowering noise emissions and stepping up wet performance to boost safety.

FEATURES AND BENEFITS

- Tailored to all the requirements of a BEV
- Extends the vehicle's range
- Simultaneously reduces energy consumption
- Ultra-low rolling resistance combined with good wet grip – squares the circle
- Incorporates various noise reduction technologies
- Contains up to 29% of sustainable and recycled raw materials
- Reduces CO₂ emissions

RANGE OF SIZES

- 11 Sizes
- 17–21 Inches
- Series 40–65
- Speed index: V

See page 16 for detailed information.

PERFORMANCE ADVANTAGES

LINAM | VAN01

Our latest generation of summer tyres for light commercial vehicles and vans. The LINAM VAN01 offers superb durability and safety, combined with excellent mileage in all applications and outstanding performance on wet roads.

FEATURES AND BENEFITS

- Enhanced durability provided by the sidewall kerb guard
- Even wear life via improved pattern stiffness and flatter tread profile
- Longer-lasting performance throughout the life of the tyre
- Extended road contact area thanks to 4D-Nano Design technology

RANGE OF SIZES

- 37 Sizes
- 12 – 17 Inches
- Series 55 – 82
- Speed index: R/S/T/H

See page 29 for detailed information.

PRODUCT DETAILS – HIGHLIGHTS

PRODUCTION AND DEVELOPMENT

Behind Falken tyres is a powerful combination of cutting-edge technologies in tyre development and state-of-the-art development environments. This wealth of expertise enables Falken to supply premium quality products with a price/performance ratio that is almost unparalleled on the market, without compromising on ride comfort and safety.

ADVANCED 4D-NANO DESIGN

Advanced 4D-Nano Design technology is the result of pioneering research and findings in molecular structures. It enables savings in fuel consumption of up to five per cent to be achieved compared to conventional tyre models, extends durability and mileage and significantly improves the tyre's performance in wet conditions.

NEO-T01 PRODUCTION PROCESS

In NEO-T01, each tyre is built around a precision-moulded metal core known as a 'former' in the exact shape and size of the finished tyre's interior. What makes this method so special is that the tyres are manufactured using a 'ribbon' method, which wraps the tread

and sidewall material around the former to extremely high-precision specifications without any overlapping or joins, and without the need for additional manufacturing tolerances. Please note that this process only applies to Runflat and FEXM tyres.

AZENIS FK520 FEXM
See page 11

4D-NANO DESIGN – FALKEN'S INNOVATIVE COMPOUND DEVELOPMENT PROGRAM

Pioneering 4D-Nano Design technology enables our engineers to simulate the complex interactions of tyre compound components at the nanoscale.

HYDROGEN ENERGY

Tyres with this mark are manufactured using hydrogen-powered boilers. This replaces fossil-fuel boilers often used in vulcanisation (vulcanisation processes generally use fossil fuels), and eliminates carbon emissions.

AZENIS FK520 FEXM
See page 11

PRODUCT-FEATURE

Special product features enhance the safety of Falken tyres still further – such as unique tread design that maximises grip in snowy and icy conditions, as well as run-flat properties.

EXTENDED MOBILITY TECHNOLOGY (FEXM TECHNOLOGY)

FEXM

FEXM tyres have reinforced sidewalls that reduce deformation if the tyre sustains damage or a puncture; they can thus continue to be driven for at least a further 80 km at a maximum speed of 80 km/h.

ZIEX ZE310 ECORUN FEXM
See page 20

AZENIS FK520 FEXM
See page 11

ECORUN TECHNOLOGY

Falken tyres with the ECORUN label feature reduced rolling resistance. By reducing energy loss through friction, they save on fuel consumption – good for the environment, and good for your budget.

PRODUCT DETAILS – HIGHLIGHTS

PRODUCT-FEATURE

ADAPTIVE CONSTANT PRESSURE – FOR A MORE UNIFORM PRESSURE DISTRIBUTION

This ground-breaking tread concept results in a perfect tyre footprint structure by evenly distributing pressure throughout the contact patch. This optimised tyre-road footprint delivers enhanced grip and driving dynamics.

AZENIS FK510

NANO BLACK

The sophisticated concave-convex design reduces light reflection and increases blackness.

AZENIS RS820
See page 6 – 7

AZENIS FK520
See page 8 – 11

e. ZIEX
See page 15 – 16

SILENT CORE

A special foam lining absorbs sound and reduces air vibrations inside the tyre to minimise road noise.

e. ZIEX
See page 15 – 16

ROUND PROFILE

Uniform tyre deflection mitigates localised tyre deformation stress, and thus minimises unnecessary fuel consumption when the tyre is under load. This reduces rolling resistance and improves handling stability and ride comfort.

AZENIS RS820

LINAM VAN01
See page 28 – 29

AERO DESIGN

The optimised tyre profile and smoother concave/convex tyre surface control air flow during driving and reduce driving resistance.

AZENIS RS820
See page 6 – 7

AZENIS FK520
See page 8 – 11

e. ZIEX
See page 15 – 16

HYBRID BAND

Cords of varying stiffness are combined to achieve both suppleness and high rigidity. Vibrations transmitted from the road surface are suppressed, reducing road noise. And unnecessary tread movement is minimised, which improves durability at high speeds, handling stability and wear resistance.

AZENIS RS820
See page 6 – 7

AZENIS FK520
See page 8 – 11

CHAOTIC ARRAY

Random tread pattern over one pitch length reduces pattern noise during driving.

AZENIS RS820

EU LABELLING

TYRE LABEL REGULATION 2020/740 – CONTENTS

Tyre labels shown as example only

- 1 QR code (direct access to public section of EU product database EPREL)
- 2 Trade name or trademark of the supplier
- 3 Tyre type identifier / article number
- 4 Tyre size, load capacity and speed index
- 5 Tyre class
- 6 Fuel efficiency pictogram, scale and performance class
- 7 Wet grip pictogram, scale and performance class
- 8 External rolling noise pictogram, value (expressed in dB(A) and rounded to the nearest integer) and performance class
- 9 Snow grip pictogram
- 10 Ice grip pictogram
- 11 The serial number of this Regulation "2020/740"

TYRE LABEL CATEGORIES

Rolling resistance

Rolling resistance denotes the force needed to keep the tyre rolling. Rolling resistance information is shown at the top left of the EU tyre label. The label

displays a pictogram of a tyre with a fuel pump and the tyre rating (A to E).

Wet grip

The wet grip label shows the tyre's grip during braking in wet conditions. The information is shown at the top right of the EU tyre label. The label

displays a pictogram of a tyre and a water droplet and the tyre rating (A to E).

Noise emission

The noise emissions of the tyre are shown in decibels.

Tyres with A rating fall below the limit by 3 dB(A) or more; B-rated tyres fulfil the limits defined for the future. C-rated tyres are below the current permissible limits.

Snow & ice grip

Tyres that are suitable for extreme winter conditions display the three peak mountain snowflake pictogram on the sidewall.

Nordic winter tyres for icy surfaces have an ice pictogram (C1 class vehicles only).

For more information on the labelling regulations for tyres, go to:
<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32020R0740>

ORIGINAL EQUIPMENT

Original Equipment – Designed for your car! Falken is constantly working for the perfect interaction between vehicle and tyre with leading vehicle manufacturers. Each car manufacturer defines a specific personality for each of its vehicle models while Falken provides the matching tyres for the vehicle. Find out about some of our current and past OE projects:

The Mercedes-Benz G-Class model is fitted with Falken WILDPEAK A/T AT3WA M0 and EUROALL SEASON AS210A M0 in size 265/60R18 and with AZENIS FK510 SUV M0 in size 265/55R19 as OEM tyres.

OEM PARTNERSHIPS

Major car brands rely on the quality of Falken Tyres. But Falken's extensive range of tyre models and sizes is also available to car dealers – a further sales channel supplying Falken high-performance tyres for cars, light vans, SUVs and 4x4s.*
