## THE TOYO WAY

### Company Philosophy

We will endeavor to continuously improve our products, and create value for everyone who we work with.

### Our Mission

To create excitement and surprise with our products that exceed customer expectations and enriches society.

### Our Vision

Our goal is to be company that:

- stays one step ahead of the future through constant technological innovation;
- drives entrepreneurial and creative spirit through a progressive culture; and
- shares in the enjoyment felt by everyone involved in our activities

# ABOUT TOYO TIRES

**For more than 75 years TOYO TIRE Corporation has been manufacturing premium performance tires. Founded in 1945, the company is headquartered in Japan, with a Technical Center that develops technological solutions to create safer, more comfortable, and environmentally friendly tires.**

In 2005 the Toyo Tire Holdings of Europe GmbH was founded in Germany as the European headquarters for the group. This structure enabled the development of a stronger and coordinated sales and marketing strategy in Europe and increased synergies with the parent company in Japan. At the end of 2019 the first European Research & Development Center opened in Germany, building a strong technical foundation in Europe.

With the start of production from the new European factory in Serbia in July 2022, the corporate structure in Europe will evolve further to a newly established holding company.

TOYO TIRES core business is the development, production, and marketing of high-quality, high-performance tires. The multifaceted range of products includes summer and winter car, 4x4 and SUV tires as well as tires for vans and light trucks.

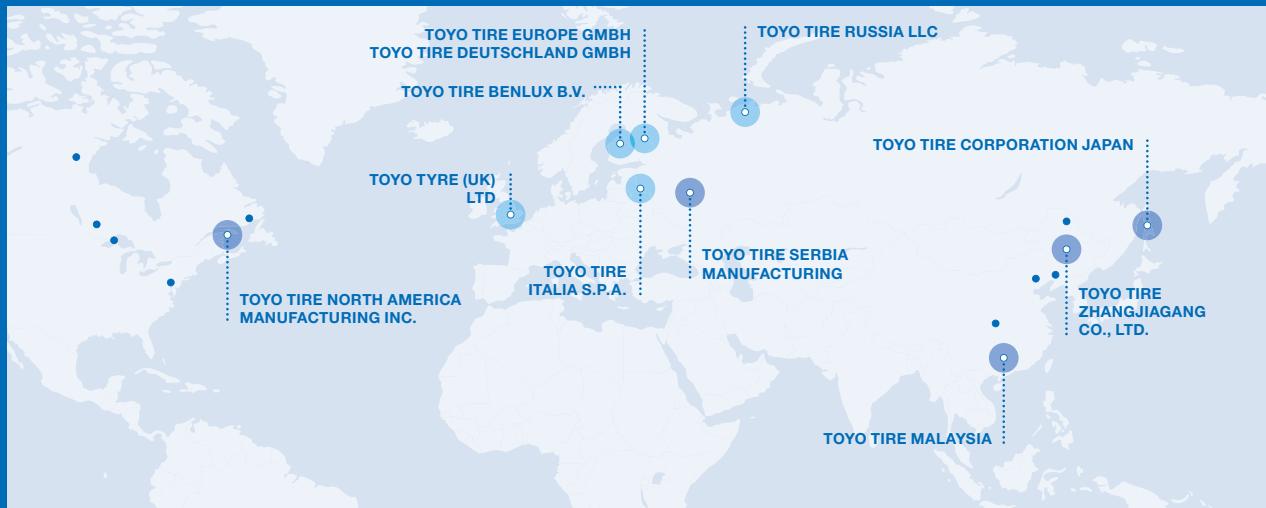

## Tire Manufacturing Videos

## PARTNER

# TIRE BUSINESS

## TESTING & DEVELOPMENT

The European R&D Center combines material research with technology development. Collected information and knowledge is shared with other R&D Centers of TOYO as well as with the Corporate Technology Center in Japan, where our tire technology is developed. Here we are improving our knowledge and advanced technologies, and we also carry out tire tests. Before starting to sell a new product to the market, we test tires in real conditions on test tracks. TOYO TIRES have two test sites in Japan.

### Miyazaki

In the southeast of Kyushu island is a trial polygon where we conduct tests at high speeds, strength tests and measurements of noise level. Polygon also has a test track for assessments of handling and exchange rate sustainability.

### Saroma

Winter tires are tested for proving ground in Sarome, on the island of Hokkaido. At this test site, engineers of TOYO TIRES make accurate measurements of operational characteristics in real winter conditions such as traction force, braking and handling on ice and snow.

# MOTORSPORT & HIGH PERFORMANCE

**TOYO TIRES is actively involved in automotive sports events worldwide like Baja 1000 - one of the hardest off-road races in the world - the Pikes Peak hill climb, and endurance races such as the "Nürburgring 24 hours race" and several major drift championships.**

Participation in competitions is testing our products on the edge of the possible. It is interesting to test tires in such extreme conditions, because it helps us to create new materials, improve tire construction and improve their characteristics. Regular pilot victories on TOYO's tires in competitions prove high quality products and motivate us to further developments.

**Cars contain more TOYO TIRES know-how than you might think. Since our founding in 1945 we have been researching and manufacturing not only in the area of tires but also automotive technology, chemical and industrial products. Within this diverse range we consistently concentrate on our core and greatest passion: high performance tires. Here only the best is good enough for TOYO TIRES.**

All over the world, we drive our tires on countless test and race tracks. The experience of numerous motorsport events, from the Nürburgring 24 hours to the Dakar Rally flows into the future development of our high performance tires.

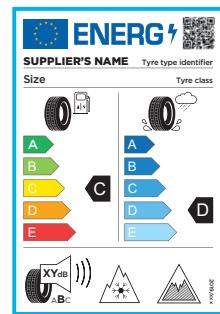

**In this way we use new developments and innovations in technology to create products able to meet the high demands of a premium brand.**

# EU TIRE LABEL

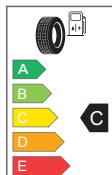

In order to provide standardised information on fuel efficiency, wet grip and external rolling noise, the European Union revised its compulsory label for all new tires, with effect from 1 May 2021. All relevant new tires must carry the revised EU label, which is intended to give end-users some essential information to help them when choosing new tires.

The QR code, read with a smartphone or other suitable reader, is intended to provide additional information:

## 1

### Reduce environmental impact

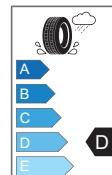

Fuel efficiency / Rolling Resistance

- Is expressed as 'rolling resistance'.
- Rolling resistance directly impacts fuel consumption and the environment.

At lower rolling resistance, the tire dissipates less energy, contributing less to resistive forces and thereby reducing fuel consumption and CO<sub>2</sub> emission.

## 2

### Increase safety

Wet grip performance

- Tires with excellent grip in the wet have shorter braking distances on wet roads.

The label displays a series of 5 classes, with tires with an "A" offering the highest wet grip and those with an "E" the lowest. Summer tires must be Grade E minimum.

## 3

### Reduce noise production

Exterior rolling noise (noise level measured in dB)

- Graded A, B or C
- A indicates the lowest grade for noise, B means a medium grade, while C is the noisiest possible grade.

The ICE grip pictogram applies to Nordic winter tires for use on iced surfaces.

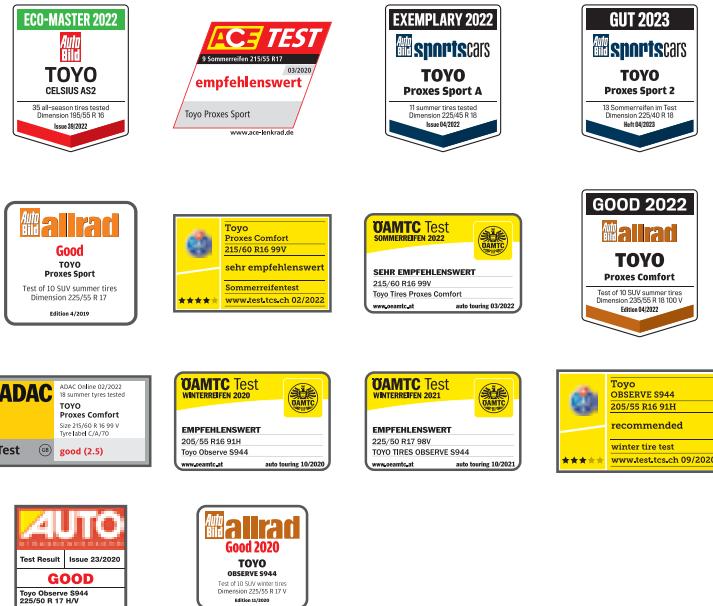

The SNOW grip pictogram represents tires for use in severe snow conditions.

## PUBLISHED TIRE TESTS

The EU tire label is designed to show information regarding 3 criteria, however there are many other important performance factors to consider:

Test criteria	EU Tire Label	Tire Tests	TOYO TIRES
<b>Dry conditions</b>			
Braking	+	+	+
Driving stability	+	+	+
Handling	+	+	+
<b>Wet conditions</b>			
Braking	+	+	+
Driving stability	+	+	+
Handling	+	+	+
Aquaplaning	+	+	+
Steering	+	+	+
<b>Tire / pattern noise</b>			
Inside	+	+	+
Outside	+	+	+
<b>Rolling resistance</b>	+	+	+
<b>Tire wear</b>	+	+	+
<b>O.E. test criteria</b>	+	-	+

More information about tire labelling regulations as well as a list of FAQs is available from the European Commission : [ec.europa.eu/energy/efficiency/tyres/labelling\\_en.htm](http://ec.europa.eu/energy/efficiency/tyres/labelling_en.htm)

# TECHNOLOGY AND PERFORMANCE

## T-MODE

### High-Efficiency and High-Precision Tire Development Platform

Over the years, TOYO TIRES has pioneered the development of vehicle-specific tires and ultra high-performance sport tires. Advanced polymer technology played a role in these breakthroughs, but they were also made possible by our proprietary virtual testing systems.

T-Mode, TOYO TIRES' latest form of this technology, uses computer simulation to virtually test vehicle-mounted tires in an array of driving conditions. Uneven tread wear, noise generation and a series of other factors are also analyzed. This data is then used to optimize tire design and enhance performance.

T-MODE

## Nano Balance Technology

### Fundamental Material Design Technology

Nano Balance Technology is a technology for developing ideal rubber materials with high precision through observation, prediction, material design, and production control, at the molecular (nano) level.

We use this to achieve a high level of both performance extremes, tire rolling resistance (low fuel consumption performance), and braking performance (wet grip performance), to offer a range of high value-added products. Moreover, we have launched a series of products made by using low fuel consumption tread that have excellent heat generation, based on the material design technology of Nano Balance Technology.

Nano Balance Technology

## A.T.O.M.

### Advanced Tire Operation Module

A.T.O.M. is a new production method to manufacture required parts and materials for tires, by winding and gluing a thin ribbon-shaped strip of rubber, approximately 15 mm wide, that is extruded onto a rotating building drum.

In the conventional production method, tire parts such as wide section of treads are wound around a building drum and both edges are aligned and laminated together to make a green tire.

The section where the edges are laminated together is called a "joint." In contrast, the A.T.O.M. production method does not create joints as found in the conventional production method, and is referred to as "jointless."

Advanced Tire Operation Module

# PRODUCT LINES OVERVIEW

## NANOENERGY

The NanoEnergy tire line is represented by only two models, but has a large size range. These are tires for passenger cars and commercial vehicles that have high wear resistance and are designed for long-term operation, as well as having a high level of fuel efficiency.

## OBSERVE

Observe tires are designed for winter conditions. Used for studded and studless winter tires, the brand name has now been applied to lamellae winter tires so it now encompasses the entire winter range. Synonymous with safety and mobility, Observe tires offer superb winter performance wherever it is needed.

## OPEN COUNTRY

The Open Country range of tires are high-strength, durable tires, designed for Crossovers and SUVs. They are characterized by short braking distances, high off-road grip, durability and high levels of comfort.

## PROXES

The Proxes tire line is a high-performance summer tire range for a wide variety of vehicle classes - from small to powerful sports cars and premium sports coupes. The models are distinguished by excellent controllability and dynamism, pronounced water drainage properties and high performance.

## SNOWPROX

Snowprox is the name for the TOYO TIRES highway speed winter tire product range. Used to differentiate European winter tires from the more extreme versions, which are adapted to ice and snow covered roads in Scandinavia for example, the brand name will be phased out over the next few years. All new and replacement winter tires will bear the brand name "Observe".

## CELSIUS

The Celsius All-Season tire range offers year-round performance without the inconvenience of having to change your tires over twice a year. Celsius tires are true all-rounders - delivering safety, control and comfort in all seasons and throughout the life of the tire.

Nano Balance Technology

A.T.O.M.

Celsius AS2 gives year round control, so you can relax and enjoy the drive. Forget changing tires or compromised performance, Celsius AS2 is a fit-and-forget solution allowing you to experience excellent performance throughout its long life.

Impressive stability at highway speeds throughout summer, combined with exceptional safety in winter, to make Celsius AS2 the ultimate all round performer.

You can't control the weather, but you can equip your car for whatever it brings.

M+S marked.

# CELSIUS

TOYO Celsius is an all season tire for cars and SUVs and is the smartest tire choice for year round comfort and safety.

Extended mobility in cold temperatures means when the weather changes, your tires don't have to. Celsius delivers control in snowy or wet roads for a wide range of small and medium sized cars.

Innovative components combine to provide highly versatile performance for continuous safe motoring, whatever the conditions. TOYO Celsius is the sensible choice for intelligent drivers.

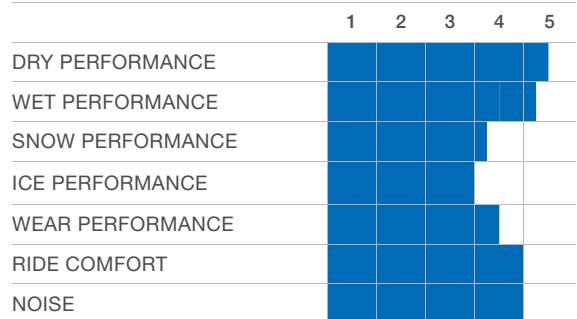

M+S marked.

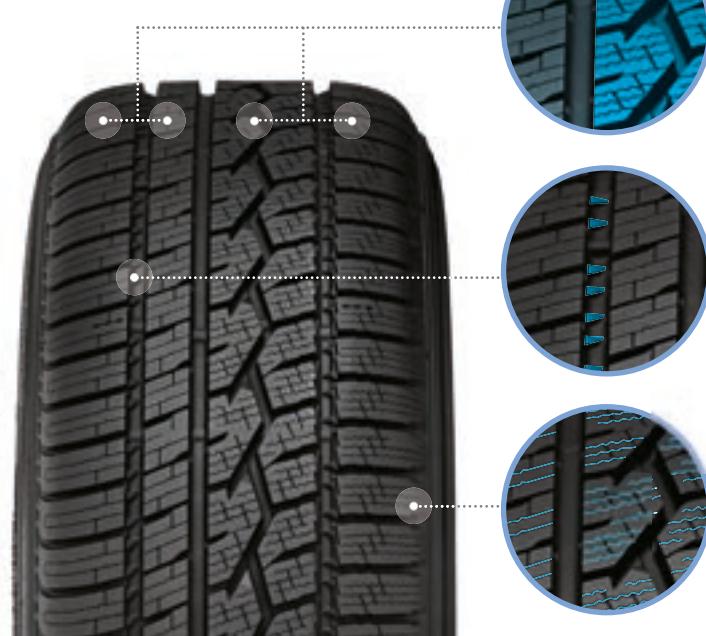

## 14 - 20 inch. Speed indices T, H and V.

			A B C
D - E	C	69 - 72	

## Performance Characteristics

## Tread Pattern Features

### VARIABLE SIBE DENSITY

Inside Tread: Higher sipe density for excellent traction on ice and snow.

Outside Tread: Lower sipe density for traction on wet and dry roads.

### SNOW CLAWS

Improves deep snow traction. Increases block rigidity for better ice and wet traction.

### MULTI-WAVE SIPES

Minimizes irregular wear for a smooth, quiet ride.

Improves braking on icy, wet and dry roads.

## Tread Pattern Features

### WIDE GROOVE & LONG SLANT GROOVE

(Wet Performance)

Ensures water drainage.

### ZIG-ZAG & CONICAL GROOVE

(Dry & Wet Performance)

Ensures water drainage and provides good traction.

### HIGH STIFFNESS RIB & TAPER SLIT

(Dry & Wet Performance)

Ensures grip and stability during cornering.

# **PROXES Sport A**

Proxes Sport A is one evolution of the ultra high performance Proxes line. Building on the high speed handling capabilities of Proxes Sport, the tread pattern, compound and construction of Proxes Sport A were fine tuned to offer enhanced performance, especially in the wet.

Proxes Sport A delivers high speed handling and wet grip to meet the needs of the most demanding drivers.

TOYO TIRES proprietary Nano Balance Technology was employed to develop the Proxes Sport A compound, advanced tire construction and optimised tread pattern design, ensuring superb steering response, stability and driving enjoyment.

# **PROXES Sport**

The Proxes Sport was designed as a focused, sports performance tire.

High speed handling and wet grip are the core requirements for drivers of the most powerful cars. Proxes Sport was developed to meet these critical needs while still delivering ride comfort and mileage.

Utilising Nano Balance Technology, Proxes Sport features an all-new compound delivering grip, wet or dry. The advanced tire construction, combines with an optimised tread pattern design, to offer enhanced steering response and increased driving enjoyment.

PROXES SPORT

# PROXES CF2

The successor of the Proxes CF1 benefits from improved tire construction and a full-silica tread compound. Partly thanks to these, the tire offers a longer tire life, better wet performance and lower fuel consumption, compared to its predecessor.

Proxes CF2 is the right choice for drivers looking for a high performance and safe tire for medium to high powered cars.

## Tread Pattern Features

### OPTIMISED PATTERN STIFFNESS

Low rolling resistance.  
Increased wear life.  
Improved wet and dry braking.

### SHOULDER RIB BLOCK

Low noise production.

### FOUR WIDE EVACUATION GROOVES

Excellent wet braking performance (B).  
Excellent water clearance.  
Outstanding safety and control in potential aquaplaning situations.

# NANOENERGY 3

 **Tecology** **T-MODE**

## Tread Pattern Features

### RIB TYPE PATTERN

Low rolling resistance.  
Improved wet and dry braking.  
Longer wear life.

### 3D MULTI-WAVE SIPES

Reduced pattern noise.  
Prevention of irregular wear.

### WIDE STRAIGHT GROOVES WITH SILENT WALL

Excellent resistance to aquaplaning.  
Reduced noise emission.

The NanoEnergy name signifies tires with environmentally friendly production and performance which maintain high levels of safety, comfort and mileage.

The third model in the NanoEnergy family benefits from improved construction materials including innovative polymers in the tread compound. These materials, along with other design technologies incorporated in the NanoEnergy 3, offer longer tire life, better wet performance and lower fuel consumption than the TOYO 350.

NanoEnergy 3, the result of TOYO TIRES Nano Balance Technology, is for drivers of compact and mid-range cars looking for a fuel efficient and safe tire.

## OLD TIMER

## TOYO 350

Reintroduced for cars first registered before October 1, 1990, TOYO 350 is ideal for small and medium cars. This classic tire offers safety, comfort and economy.

### 14 inch. Speed indices T.

Toyo 350 is exempt from regulation EC 1222/2009 and UN/ECE-R117-02 as the tire is designed to be fitted only to vehicles first registered before 1 October 1990.

# OBSERVE S944

Observe S944 benefits from TOYO TIRES' Nano Balance Technology. The combination of its materials, construction and compounds offers safe and comfortable driving, which can still be enjoyed when the weather turns cooler.

Designed to cope with typical cold and rainy European winters, Observe S944 is safe and secure if snow falls, or icy roads make driving more challenging.

M+S marked.

# **SNOWPROX S954**

The Ultra High Performance winter tire, Snowprox S954, perfectly responds to the demands of modern, medium and high-class cars.

Snowprox S954 offers confident braking and grip on wet and snowy roads. Major innovations in the tread pattern and compound technology provide safe and precise handling in typical European winter conditions.

M+S marked.

## Tread Pattern Features

### TREAD COMPOUND

Better grip in the snow and wet.

### ASYMMETRICAL DESIGN

Exceptional wet grip with 10% short stopping distance on wet roads (compared to S953).

### SILICA COMPOUND

Improved dispersion of silica and lowered heat generation for wet performance and low rolling road resistance.

# **SNOWPROX S943**

Snowprox S943 is suitable for a wide range of small and medium sized cars. Compared to its predecessor Snowprox S942, the Snowprox S943 offers enhanced wet grip, wear life and rolling resistance with improved EU label grades.

Highest level of wet and dry performance have been achieved without sacrificing snow performance.

M+S marked.

## **Tread Pattern Features**

### **INCREASED SIPE DENSITY AND OPTIMISED GROOVE RATIO**

Balanced performance in snow, wet and dry.  
Grip on snow.  
Improved mileage.

### **WIDE SHOULDER BLOCKS WITH HIGH SIPE DENSITY**

Improved braking in wet and snow conditions.

### **TWO WIDE LONGITUDINAL GROOVES AND DIRECTIONAL TREAD**

Excellent slush and water clearance.  
Increased grip on snow.  
Improved rain performance.

## Tread Pattern Features

### SERRATED STABILITY RIB

Edge effect on snow surface.  
Provides good snow traction.

### SPIRAL EDGE SIBE

Edge effect to 360° on ice and snow surface.  
Provides good cornering performance.

### CONTINUOUS SWING SIBE

Edge effect by controlling of sipe binding and exhibits water removal power more effectively.  
Provides good ice braking performance.

WINTER  
CAR TIRES

# OBSERVE ICE-FREEZER

Observe Ice-Freezer is designed for optimum traction and braking on ice and snow. A consistent performance throughout the tire's life makes it ideal for use in extreme winter conditions.

Excellent in the most extreme winter conditions Observe Ice-Freezer has a directional tread pattern with an optimized stud hole design. It offers exceptional stud retention and improved acoustic comfort. Fir tree shape tread design provides the best possible lateral road holding, even in various difficult conditions.

M+S marked.

## Tread Pattern Features

### FIR TREE SHAPE TREAD DESIGN

Improving traction/braking performance in ice and snow conditions.

### SNOW BLADE AT UPPER SIDEWALL

Improves traction in winter-road conditions.

### GEAR-SHAPED EDGE AROUND STUD HOLE

Edge effect on ice and snow surface.

# OBSERVE G3-ICE

According to STRO (SCANDINAVIAN TIRE & RIM ORGANIZATION), the number of studs will be reduced from 110 pcs (15 inch) to max 50 pcs/m from 1st July 2013.

Observe G3-ICE is designed for optimum traction and braking on ice and snow. A consistent performance throughout the tire's life makes it ideal for use in extreme winter weather conditions.

Excellent in the most extreme weather conditions. The Observe G3-ICE has a directional tread pattern with an optimised stud hole design. This offers exceptional stud retention and improved acoustic comfort.

The directional tread pattern design provides the best possible lateral road holding, even in the most difficult conditions.

M+S marked.

# **PROXES SPORT SUV**

Answering the need for superior handling, Proxes Sport SUV was designed as a focused, sports performance tire.

High speed handling and wet grip are the core requirements for drivers of the most powerful cars. Proxes Sport SUV was developed to meet these critical needs while still delivering ride comfort and mileage.

Utilizing Nano Balance Technology, Proxes Sport SUV features a compound delivering wet or dry grip.

The advanced tire construction, combines with an optimised tread pattern design, to offer enhanced steering response and increased driving enjoyment.

# **PROXES comfort**

Proxes Comfort, available for car and SUV, was developed to provide premium levels of stability and comfort for relaxed and enjoyable everyday driving.

The tread compound and internal structure of Proxes Comfort give the tire enhanced stability at speed along with confident handling and excellent braking.

Dynamic performance improvements, combine with quiet, comfortable driving to make Proxes Comfort one of the most capable all-round tires available.

# **PROXES CF2 SUV**

Proxes CF2 SUV was developed to complement the characteristics of smaller crossover and compact SUV cars.

With its silica tread compound, Proxes CF2 SUV offers shorter wet braking and improved fuel economy.

The lightweight construction combined with a new compound, provides longer tire life and makes the Proxes CF2 the smart choice for SUV's.

# OPEN COUNTRY U/T

The Open Country U/T has been developed to satisfy owners of a wide variety of contemporary luxury Pickups and SUVs requiring quiet and comfortable ride, stable handling capabilities, and low fuel consumption in urban type of road operations.

With its purely functional tread design and special silica tread compound the Open Country U/T has accomplished its design goal of low pattern noise, improved fuel consumption, excellent handling and braking performance on both wet and dry road conditions.

## Tread Pattern Features

### FIVE VARIABLE PITCH PATTERN

Pattern noise reduction.

### SILENT WALL

Dense serration on the groove wall for pattern noise reduction.

### MULTI-WAVE SIBE

Good cornering performance due to increased lateral block stiffness.  
Helps to prevent irregular wear.

## **OPEN COUNTRY A/T<sup>plus</sup>**

The premium Open Country A/T Plus is the perfect tire for drivers who want to go wherever the road leads, from highway to the forest.

Its asymmetric five-rib pattern and rigid block design allows enhanced durability, exceptional high speed on road response and is optimised for off-road handling.

All-terrain performance is complemented with technologies that promote a smooth and quiet ride. The aggressive sidewall of Open Country A/T Plus is designed to enhance the style of your SUV.

M+S marked.

# OPEN COUNTRY A/T™ III

The Open Country A/T III all-terrain tire delivers gripping off-road traction with responsive and predictable onroad handling. With a strong focus on wet performance, durability, and treadwear life, TOYO introduces advanced tread design, construction and compounding.

The Open Country A/T III provides a quiet ride with exceptional stability, instilling driving confidence no matter the terrain. Built tough, it offers peace of mind, regardless of terrain or weather.

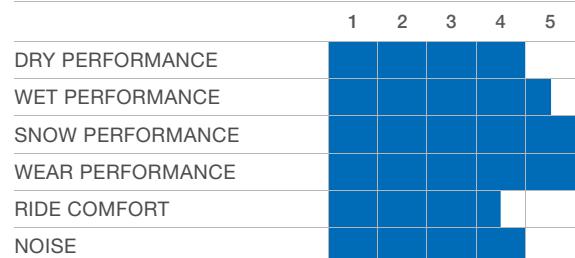

M+S marked.

## Performance Characteristics

## Tread Pattern Features

### INCREASED LATERAL GROOVES

Improved snow performance and off-road traction.

### LARGE TRACTION BLOCKS

- Zigzag Block
  - Traction performance (Edge effect).
- Zigzag Groove
  - Snow traction / Off-road performance..

### BUTTRESS DESIGN

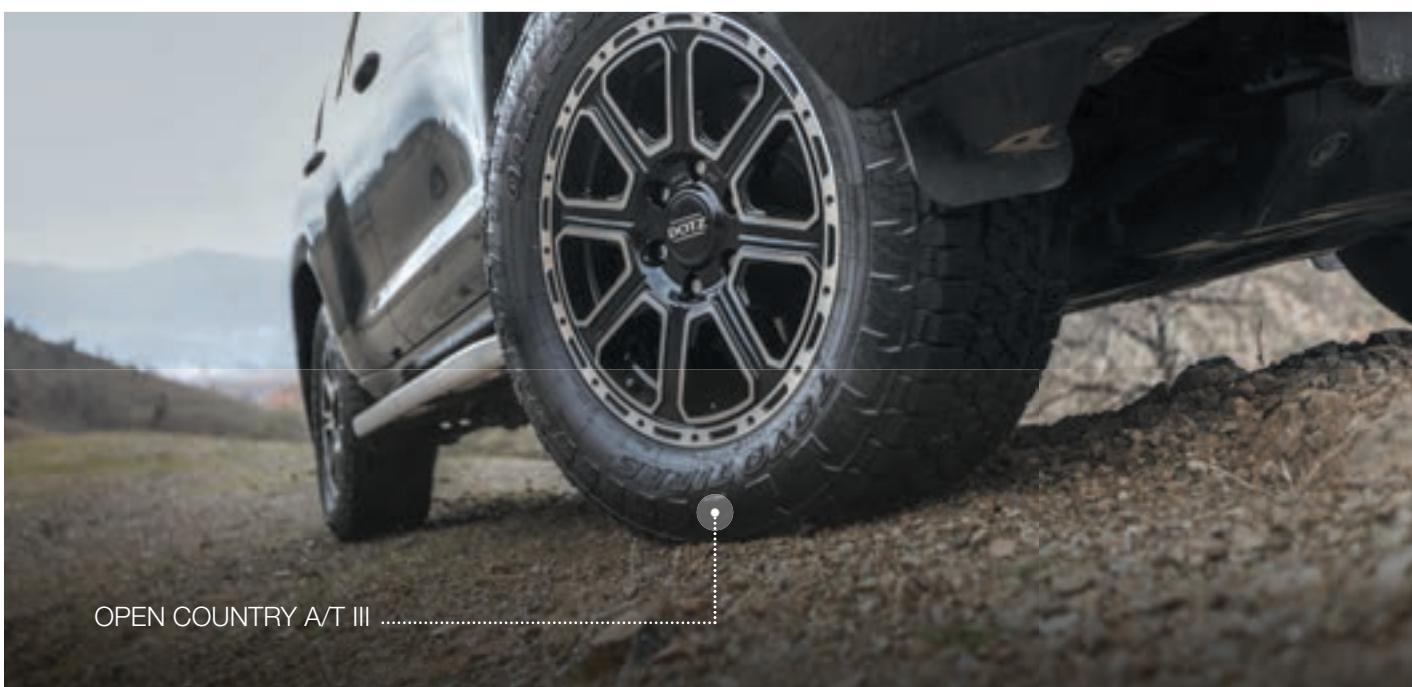

Durable protection against external damage.

WINTER SUV  
& 4 X 4 TIRES

# OBSERVE S944

Nano Balance Technology

Observe S944 SUV benefits from TOYO TIRES' Nano Balance Technology. The combination of new materials, construction and compounds offer safe and comfortable driving, which can still be enjoyed when the weather turns cooler.

Designed to cope with typical cold and rainy European winters, Observe S944 SUV is safe and secure if snow falls, or icy roads make driving more challenging.

M+S marked.

## **SNOWPROX S954 SUV**

Optimised for wet grip in cooler temperatures, the new Snowprox S954 SUV is home in a wide range of winter conditions.

With its exceptional grip, Snowprox S954 SUV allows heavier SUV vehicles to confidently brake on wet and snowy roads. Innovative construction and materials technology provide safe and precise handling in typical winter conditions.

Snowprox S954 SUV is available for a wide range of premium and high performance 4x4 and SUV cars.

M+S marked.

SNOWPROX S954 SUV

# OBSERVE GSi-6

Observe GSi-6 SUV has been optimised to perform safely and securely in a variety of winter driving conditions.

Its new compound, advanced construction and aggressive tread design enable drivers to overcome any road conditions; whether ice, snow or slush.

M+S marked.

## Tread Pattern Features

### SERRATED STABILITY RIB

Edge effect on snow surface.  
Provides good snow traction.

### SPIRAL EDGE SIBE

Edge effect to 360° on ice and snow surface.  
Provides good cornering performance.

### CONTINUOUS SWING SIBE

Edge effect by controlling of sipe binding and exhibits water removal power more effectively.  
Provides good ice braking performance.

# OBSERVE ICE-FREEZER

Observe Ice-Freezer SUV is designed for optimum traction and braking on ice and snow. A consistent performance throughout the tire's life makes it ideal for use in extreme winter conditions.

Excellent in the most extreme winter conditions Observe Ice-Freezer SUV has a directional tread pattern with an optimised stud hole design. It offers exceptional stud retention and improved acoustic comfort. The tree shaped tread design provides the best possible lateral road holding, even in various difficult conditions.

M+S marked.

# OBSERVE G3-ICE SUV

According to STRO (SCANDINAVIAN TIRE & RIM ORGANIZATION), the number of studs will be reduced from 110 pcs (15 inch) to max 50 pcs/m from 1st July 2013.

Observe G3-Ice SUV is designed for optimum traction and braking on ice and snow. A consistent performance throughout the tire's life makes it ideal for use in extreme winter weather conditions.

Excellent in the most extreme weather conditions. The Observe G3-Ice SUV has a directional tread pattern with an optimised stud hole design. This offers exceptional stud retention and improved acoustic comfort.

The directional tread pattern design provides the best possible lateral road holding, even in the most difficult conditions.

M+S marked.

## OBSERVE ICE-FREEZER VAN

**NEW**

A studdable tire providing reliable safety throughout the most extreme winters. Observe Ice-Freezer VAN addresses a need for light goods vehicle drivers to be able to complete shipments, whatever the weather.

The ability to deliver reliably and safely, especially in icy Scandinavian winters, drove the development of this tire.

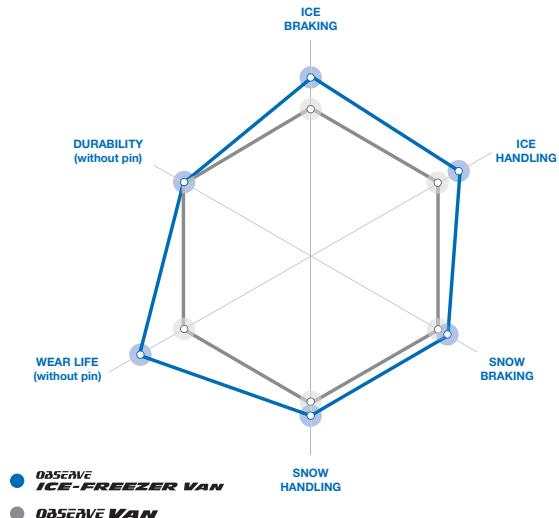

M+S marked.

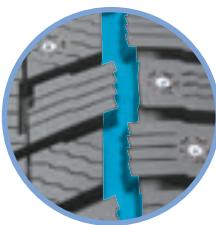

**15 - 17 inch. Speed indices R.**

### Performance Characteristics

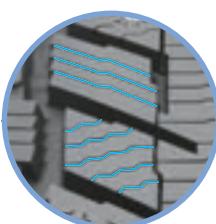

### Tread Pattern Features

#### ZIGZAG MAIN GROOVE

Effective for snow traction.  
Improved the flexibility of stud distribution.

#### ANGLE VARIATION SIBE

Effective for ice and snow performance.

#### WIDE DISTRIBUTION OF STUD LINES

Effectively scratch the ice road surface.  
(Tire will be delivered without studs).

# CELSIUS CARGO

The durable construction of Celsius Cargo is built for year round reliability in applications including local deliveries, services and transportation. Celsius Cargo is part of the Celsius all-weather tire line, which also includes the Celsius and Celsius AS2 for passenger cars and SUVs.

Offering better traction on snow and ice than a typical all-season tire and longer tread life than a winter tire, Celsius Cargo also carries the Three-Peak Mountain Snowflake Symbol. To owners, these benefits mean more time on the job and less downtime switching tires.

# NANOENERGY VAN

NanoEnergy Van is the reliable and economical summer tire for vans and is designed to maintain cost-effective operation while saving fuel. The NanoEnergy Van, with its reinforced tire casing and handling stability offers a reliable drive on dry and wet roads.

Shorter braking distance and improved driving stability offer more safety, while its reinforced carcass helps extend tire life providing good reliability.

# OBSERVE VAN

T-MODE

This reliable and economical winter van tire is designed to keep business moving, whatever the conditions. In cold, wet wintry conditions or even in snow, Observe Van tires offer unrivalled mobility.

Observe Van tires are hard wearing. Nano Balance Technology has been employed to develop enhanced compounds. These, combined with a strengthened casing and innovative tread block design, result in a longer lasting tire.

M+S marked.

14 - 17 inch. Speed indices R, S, T and H.

## Tread Pattern Features

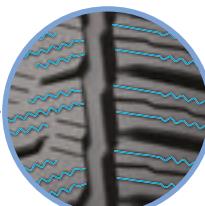

### DOUBLE ZIGZAG RIB

Improves wear performance with high rib stiffness.  
Edge effect on snow surface.

### LARGE SHOULDER BLOCK

Improves wear performance with high block stiffness.

### 3D MULTI-WAVE SIPES

Suppress the movement of the block, thus providing good cornering performance.

## COMPETITION TIRES

# COMPETITION TIRES

PROXES R888R

COMPETITION  
TIRES

# PROXES R888R

The Proxes R888R delivers increased dry grip and steering performance for track use.

The tire offers a quick warm up and sustained handling over multiple laps and heat cycles. The improved performance gives a competitive advantage on dry tracks.

## CAUTION:

The rubber compounds used in these tires have unique properties that can cause them to lose some of their flexibility when used or handled in temperatures below -9°C. This loss in flexibility can lead to potential cracking and other damage to the tire.

To minimise the chances of this happening, consumers and installers are advised to follow the instructions below:

1. Do not move or operate a vehicle fitted with these tires in temperatures below -9°C.
2. Avoid moving these tires in temperatures below -9°C.
3. Before mounting or dismounting, store these tires for at least 24 hours in a temperature controlled environment of 20°C or warmer and always inspect for signs of cracking before mounting. Never use tires that have cracked.
4. Remove the wheels from the vehicle and deflate the tires to half the normal air pressure during prolonged periods of inactivity or for storage.
5. Aquaplaning and wear are good for a competition tire but are inferior to a normal road tire. Because of this, PROXES R888R is not recommended for everyday road use.

For best performance, PROXES R888R should be changed after two seasons maximum, irrespective of wear.

## 13 - 20 inch. Speed indices V, W and Y (Y).

## Tread Pattern Features

### OUTER TREAD AREA

Large tread block on outer area.  
Enhanced dry cornering.  
Increased lateral limit.

### GG COMPOUND

Fast warm up time.

### WIDE CENTER RIB

Precise steering response.

PROXES R888R

# ORIGINAL EQUIPMENT OVERVIEW

Optimum products can only be obtained if you know what demands they are expected to fulfil. For that reason we concentrate on the perfect combination of road and tires. It goes without saying that each TOYO tire undergoes an extensive research, development and test phase to achieve this.

# ORIGINAL EQUIPMENT OVERVIEW

Only repeatedly tried and tested high quality and effective materials can produce the road performance which has distinguished us for years. We make the highest demands not only of road performance and safety, but also of attractive design so you can expect innovation from TOYO TIRES for a first-class driving experience.

**Innovations for a first class ride.**

# TIRE CARE AND MAINTENANCE

## Proper care of tires increases road safety and tire life.

Key Advice:

### Air Pressure

Your safety depends on maintaining the prescribed air pressure. Always follow the recommendations of the vehicle manufacturer unless you have specific written advice from a tire maker.

A tire driven on with insufficient air pressure is a serious safety risk. The increased deformation of the casing leads to excessive heat build up which can result in sudden tire failure. Additionally wear will increase especially in the shoulder area of the tread necessitating premature removal.

Over inflated tires will have reduced road performance and inferior shock absorption. Additionally, wear will increase in the center of the tread leading to premature removal.

### Most important points (recommendations):

1. Measure air pressure on cold tires (before driving).
2. Air pressure must correspond to axle load (see operating instructions).
3. Air pressure must be kept equal across an axle.
4. Check air pressure at least once per week.
5. Check air pressure before each long trip and increase by 0.2 bar, so that the tire temperature can be kept low at high speed.
6. Air pressure for M+S tires should be 0.2 to 0.3 bar higher than the corresponding summer tires.
7. After checking air pressure always refit the valve caps, as they prevent dust and dirt from entering and compromising air tightness. Valve caps with a sealing ring are best, as they act as a secondary air seal assisting the tire valves.

# TIRE CARE AND MAINTENANCE

## Tire Sizes

The vehicle registration documents often show the tire sizes a vehicle should be supplied with. Taking into account axle load and maximum speed (incl. variation) care should be taken that the tires have the necessary load and speed index. In the case of V/W/Y tires the maximum load deduction (for V max > 210/240/270 km/h) must also be taken into account.

## Loads

Like insufficient air pressure, vehicle overloading can lead to premature wear and tire failure. The vehicle registration documents may detail among other things the maximum kerbside weight of the vehicle in kilograms as well as the maximum axle weight in kilograms for the front and the rear axles. Overloading can easily occur when going on holiday with a full car, roof rack and/or caravan.

80	450	96	710	112	1120	128	1800	144	2800	160	4500

## Speed

The tires fitted by a vehicle manufacturer have the appropriate speed symbol considering the maximum speed. It is possible to switch to the same tire size with a higher speed index, but tires should never be substituted for tires with a speed symbol equal to less than the maximum speed of the vehicle (incl. variation).

Exceptions are M+S radial winter tires: in this case, care must be taken not to exceed the speeds indicated by the symbol on the M+S tire. Vehicles capable of higher speed than M+S tire speed symbol indicates, must have a notice, visible to the driver indicating the maximum speeds of the M+S tires. In some countries this is a legal requirement.

Speed Symbol	J	K	L	M	N	P	Q	R	S	T	U	H	V	W	Y	(Y)
Maximum Speed km/h	100	110	120	130	140	150	160	170	180	190	200	210	240	270	300	OVER 300

For applications outside the range of the Y speed symbol, the service conditions (including the actual speed capabilities, load capabilities and the relevant inflation pressure) for vehicle characteristics will be agreed between the vehicle and tire manufacturers when using ZR marked tires with a service description within brackets, for example "(95Y)".

All uses of Performance characteristics in this catalogue are displayed as a guide only, to allow comparison with other products of the same category. Their purpose is to help select the most appropriate tire. No guarantee of performance can be inferred from these characteristics.

All Toyo brand tires are subject to continuous development. While every effort is made to describe goods and services accurately in this publication, no warranty is given as to accuracy and no responsibility will be accepted for any error or omission. TOYO TIRES reserves the right to amend the specification of tires without notice.
